THAT CONNECTS PEOPLE
IN REAL TIME

HISTORY

APATRONICS - Digital Signage by Apametal is a digital signage brand from Grupometal focused on digital communication for companies, which offers the best LED and LCD solutions on the market.

From conception to final product, Apatronics, together with its partners and suppliers, aggregates high quality services, always seeking to offer the best hardware and software solutions for content management, appropriate to the size and needs of your business.

With 50 years of activity in the implementation of Corporate Image programs, Apametal is recognized for offering complete solutions with a high level of rigor and quality, also committing itself to an after-sales service that is always available and capable of responding to needs of our customers.

At your disposal at our headquarters, we have the largest LED Showroom in Europe, where you can see live and in color the most varied formats of LED, LCD Touchscreens and Transparent screens, which will make a difference in the digital communication of your business.

VALUES

PARTNERSHIP

We value our partners and we work closely together to be present in all stages of services provision, from design and conceptualization, to after-sales service. Our commitment goes from initial engagement to ongoing satisfaction within all our services.

EXPERTISE

Grupometa's vision is focused on state-of-the-art facilities and machinery, from our industrial division, to carpentry, acrylics and metal workline, we are able to differentiate ourselves in the market.

We are an all-in-one company.

RECOGNITION

With over 50 years of experience, our portfolio and history of our work has proven our resiliency and standards in providing our services. We are proud to be market leaders and being able to be flexible and satisfy the needs of our clients.

MUPI CASCAIS 55"

This version [model 1], entirely made of Corian®, with the exception of the top cover in hollow stainless steel, in order to allow efficient internal air conditioning. Access for maintenance is guaranteed through two doors located on the sides with an IMAN lock.

Can be produced in a single-sided version

Mod. 1

Mod. 2

Product Description

The **MUPI CASCAIS 55"** screen, it is intended for indoor use, however the excellent quality of the material makes it possible to use it outdoors.

Produced in Corian®. Product of extreme quality and minimalist appearance.

Corian® is non-porous and hygienic. Its smooth surface does not allow residues to penetrate, which makes cleaning easier. Bacteria and fungi also do not penetrate. Once clean, the Corian® surface is really clean. Corian® surfaces are renewable and ecological. Stains and scratches can be easily removed using a sponge and a regular cleaning product. Effortless cleaning restores the original surface. The glues used to glue the surface provide a finish with imperceptible seams.

MUPI PORTO
55" 4K

Product Description

MUPI PORTO 55" 4K Apatronics – Digital Signage by Apametal is part of a new generation of premium digital billboards that combine advanced technology with refined design. Defined by clean, straight lines and high-quality finishes, its structure incorporates wood as a natural and organic material, reinforcing a sustainable approach through the use of a renewable and easily recyclable resource. The screwless system allows quick and convenient access for equipment adjustment or maintenance. The unit supports three power input options—through the floor, rear, or top—offering flexible installation while keeping cables discreetly concealed. An anti-noise finish effectively reduces the sound of the cooling system, ensuring quiet and efficient operation.

Specs 55"

PITCH 1.5/1.8

High contrast, definition and resolution screens.

Apametal, in partnership with the professional range of LG screens, presents you with a product with the best image quality, both in terms of color and detail. Your content gets more prominence compared to all other offline / static communication.

Product Description

The **LED MUPI PITCH 1.5/1.8 SERIES INDOOR** by Apatronics - Digital Signage by Apametal, is a premium quality product, with a standard size of 1000x2000mm (vertical) and a modular system that allows for greater ease and speed in the maintenance and repair of LEDs. Anti-noise finish effectively muffles the sounds emitted by the cooling system. With the LED solution, it is possible to give greater prominence and brightness to your communication. Due to the reduced pixel pitch, it can be viewed both at short, but also at medium and long distances.

DIGITAL MEETING DISPLAY

55" 4K / 65" 4K

DAY BY DAY

Product Description

The **Digital Meeting Display 55" / 65"** 4K Apatronics - Digital Signage by Apametal is a premium quality product, more economical, but also more versatile, light and flexible due to its weight. Its structure is made of epoxy lacquered iron with a screwless system.

This MUPI has the particularity of rotating in 90°, with the possibility of having it in a vertical position but also in a horizontal position. The VESA standard allows you to receive several other screens of different formats, as long as they are compatible with this system.

It is an equipment especially recommended for events and presentations, not only for its rotational flexibility, but also for its accessible mobility (it can be mounted with wheels). The 55" version also has a built-in sound system.

Specs 55"

3000 x 2000 mm - SMD2.6 / SMD3.9

3500 x 2000 mm - SMD2.6 / SMD3.9

4000 x 2500 mm - SMD2.6 / SMD3.9

INDOOR SOLUTIONS

Pitch 3.9/2.5

Led LG Indoor Pitch 2.5 in Almada Negreiros CCB Portuguese Presidency European Union

Two Apatronics Led Window Series 2.5 x 1.5 Mts SMD 4 HB in Vila do Conde

Led Window LG Series 3000mm x 2500mm SMD 3.9 HB

LED BANNER

The LED BANNER by Apatronics - Digital Signage by Apametal, is a High Brightness LED display solution for interiors (indoor) or outdoor environments (outdoor), which fit both on building facades, as store entrances, exhibitors, events, stadiums football, among many others.

Its Pixel Pitch (pitch between pixels) defines the quality and definition of the content to rotate, and the smaller the distance between them, the greater the detail of the video. By default, the lowest Pixel Pitch is used for viewing at short distances and especially indoors.

For outdoor spaces, in addition to the need for the panels to be brighter, the Pixel Pitch may be higher (thus reducing your costs), as they are meant to be viewed at medium and long distances.

Standard Sizes/Formats - Pixel Pitch

- 3840 x 640 mm - SMD6
- 5120 x 640 mm - SMD6
- 3840 x 960 mm - SMD6 / SMD8
- 6720 x 960 mm - SMD6 / SMD8

LED BILLBOARD SINTRA PREMIUM

Product Description

The LED BILLBOARD SINTRA PREMIUM (MONOFACE or DOUBLE FACE) Apa-tronics - Digital Signage by Apametal, is a High Brightness LED display solution for outdoor environments, ideal for the digital communication of your business, brand or product in public spaces. It can be applied along ICs and High-ways, crossing areas with high traffic, industrial areas and business parks.

Its Pixel Pitch (pitch between pixels) defines the quality and definition of the content to rotate, and the smaller the distance between them, the greater the detail of the video. For outdoor spaces, in addition to the need for more bright-ness to highlight the contents, the Pixel Pitch may be higher (reducing costs), as these are to be viewed at medium and long distances.

LED BILLBOARD SINTRA PREMIUM

WIDE RANG OF COLORS

3 years warranty.

A billboard with a green background. On the left, there is a white leaf logo. To its right, the text "YOUR LOGO" is displayed in white, with four small white circles below it. In the center, the text "FOCUS ON LIVING NOT WASTING" is written in white, stacked vertically. On the right side, a hand is shown holding a white tote bag filled with fresh green vegetables. At the bottom of the billboard, the website "WWW.YOURSITE.COM" is printed in small white letters.

LED BILLBOARD STANDARD

The **LED BILLBOARD STANDARD MONOFACE** Apatronics - Digital Signage by Apametal, is a High Brightness LED display solution for outdoor environments, ideal for the digital communication of your business, brand or product in public spaces.

It can be applied along ICs and Highways, crossing areas with high traffic, industrial areas and business parks.

WHAT DISTINGUISHES US

QUALITY

Innovative and unique products that meet European standards and certifications, which allow us to provide equipment of superior quality. We are always at the forefront of a market that develops very quickly.

DISTRIBUTION

For any part of the country or the world, we activate all logistical means to respond to any challenge, within the stipulated deadlines.

CONSULTANCY

We give expert support so that each customer find the best solutions to monetize your equipment and guarantee the return on investment in a short period of time.

INTEGRATED SOLUTIONS

From technical advice to financing, installation, training and maintenance solutions, we have highly qualified professionals. We deliver integrated solutions.

PRICE

We guarantee competitive prices, depending on the equipment chosen. We have suitable solutions for each case, according to customer's need.

TECHNICAL SUPPORT

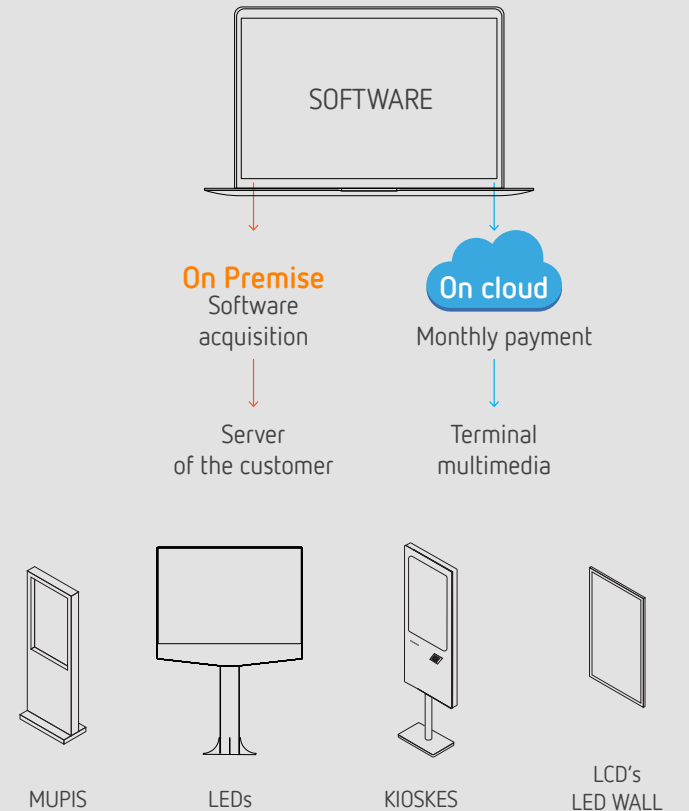

During the installation of the equipment, our team guarantees the necessary training for their management. In the after-sales period, you can count on the support of our technicians.

FINANCING

We are committed to supporting the technological development of our customers and partners. To do this, we offer financing solutions tailored to the needs of each project. We help each client to grow in a sustainable way so that they become leaders in the markets in which they operate.

CONTENT MANAGEMENT

Regardless of the type of business, Apatronics, together with its equipment, offers content management, which can be used in two scenarios:

Content management solutions can be used with various digital end-points or screen brands. In order to be comprehensive platforms, they allow the distribution and management of content on various supports, from a tablet to an external LED Wall, providing ease of operation, as the platform is unique and transversal to the equipment.

An aerial view of a city at sunset. The sun is low on the horizon, casting a warm orange glow over the skyline. In the foreground, a multi-lane highway is filled with traffic. Buildings on either side of the highway feature various digital billboards and advertisements. The sky is filled with soft, colorful clouds.
